

SO, HOW DO I GET THERE?!

A long time ago S. Platte River drive was created. It was promised to be a prosperous area with many happy businesses. S. Platte River drive was so successful that its creators decided to make two of them without any distinguishing changes. The problem is that the GPS systems of the future would go into a panic whenever met with an address from these streets.

So, because modern technology has failed us, we decided to make a map for you to help you get here.

Here is a cheat sheet: **if the address numbers you're looking at are odd, you're on the wrong side of the (platte) river.**

Hope this helps! -Labse7en.
